

# AYTAC QASIMOVA

## Economist

I am studying at the Faculty of Economics and Management at Azerbaijan State University of Economics. During my studies, I have not only deepened my knowledge in economics but also developed a particular interest in accounting and finance. Thanks to my analytical thinking, sense of responsibility, and organizational skills, I strive to combine theoretical knowledge with practical experience and actively participate in various trainings and projects to grow in this field. In the future, I aim to work as a professional accountant or economist.
